Challenges in
Laparoscopy & Robotics
Since 2004 - Vincenzo Pansadoro Foundation

Dear Friends and Colleagues,
It is a great pleasure to welcome you again to Barcelona for the European Meeting on Laparoscopic and Robotic Urologic Surgery.

“Challenges in Laparoscopy and Robotics” has reached the 16th edition and the concept that initiated this adventure is quite alive and shows great potential for the future of Urology. The comprehensive scientific program will include live laparoscopic and robotic surgeries performed by the world’s most prominent urologic surgeons. In the past meetings, we have witnessed many challenging procedures. It is now time to expand our indications and to look forward to new challenges like the Single port trans-perineal prostatectomy, the robotic kidney transplantation in the obese recipient, the buccal mucosal repair for ureteral strictures, the Cava Thrombus in RCC, the IMAGE1 S and the retroperitoneal LND and Partial Nephrectomy.

We are enthusiastically anticipating an extremely stimulating meeting. Live surgery, discussions and thought-provoking debates will take place with the participation of the best urologists in the International arena. There will be two monitors transmitting live different surgeries at the same time. As an innovation this year we have introduced one screen dedicated to a series of 25 rare and difficult surgeries presented by the actual surgeons. The series is entitled "One hour with . . .". Each delegate will be provided with headphones with the possibility to select the preferred moderation.

All questions will be transmitted to the moderators via Twitter or directly via moderators. We are very proud to host this 16th International Meeting again in Barcelona, the perfect city for old antiquities and innovative techniques to convene. All the surgeries will be transmitted live from Fundació Puigvert, one of Europe’s leading centers in Urology.

We hope that the challenging procedures that you will see will lead the way towards defining the future of Urologic Surgery.

Clothing

During the entire meeting, attire will be informal.

Climate

The Mediterranean climate is in full swing in July, which means you can expect high temperatures, plenty of sunshine and clear blue skies for most of the month. Barcelona sits on an elevated plateau on Spain's northeast coast. Its position leaves it open to cooling winds from the Atlantic, which can lower temperatures and make the weather much colder at night. Temperatures range from 16°C to daily highs of 24°C. Rain is very rare and Barcelona weather in July is mostly warm, dry and sunny.

Liability

CiLR 2019 Secretariat and Organisers cannot accept liability for personal accidents or loss of or damage to private property of participants and accompanying persons. Participants are advised to take out their own personal travel and health insurance for their trip.

Official Language

The official language of CiLR 2019 is English

Social media

During the congress we are using social media to encourage an open discussion on urology science and experiences. CiLR congress speakers, opinion leaders, delegates and media share their ideas, commentary and photos on Facebook and Twitter. You can follow CiLR on Facebook via www.facebook.com/challengesinlaparoscopy and on Twitter via @CiLR19. Use #CiLR19 to discuss the Congress, and join the conversation!

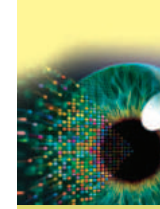

IMAGE1 S™ – mORe than a camera

- High resolution camera system for universal use
- Optimal visibility conditions due to enhanced colour space, large depth of field and homogeneous illumination
- Greater richness of detail thanks to 4K resolution and enhanced image data processing
- Perfectly integrated peripheral units ensure the ideal image chain
- Maximum adaptability to all requirements through modular technologies (rigid and flexible endoscopy, 3D, ICG, PDD etc.)
